Vukašin Riznić

Belgrade, Serbia

riznicvukasin@gmail.com | vukasinriznic.me | linkedin.com/in/vukasinriznic | github.com/vukasinriznic

Summary

Full-Stack Software Engineer focused on **React & Next.js** and **Python (FastAPI)**, experienced in building and shipping production web applications end-to-end. Founder of a web development studio (Afera Digital) and co-founder of a live e-commerce product (DajPeticu), pairing solid engineering with real product ownership. I'm now aiming to focus on backend engineering with Python or Java within a company's engineering team.

Education

Računarski fakultet - University of Belgrade **Expected 2026**
Bachelor's degree, Information Technology - final thesis in progress *Belgrade, Serbia*

- Relevant Coursework: Data Structures & Algorithms, Databases, Object-Oriented Programming, Web Development.

Experience

DajPeticu dajpeticu.shop **2026 – Present**
Co-Founder & Developer

- Co-founded an e-commerce business selling NFC "Google review" stands and single-handedly built and shipped the entire production website, now serving 100+ customers.
- Built the full stack in Next.js, TypeScript and Tailwind with a Supabase (PostgreSQL) backend, order-management API and a complete cart-to-checkout flow (cash on delivery) with automated confirmation emails (Resend).
- Handle SEO, structured data, Google Maps integration and customer acquisition through Instagram marketing.

Afera Digital aferadigital.rs **2026 – Present**
Founder & Full-Stack Developer

- Founded a web development studio and delivered 5+ client websites and web apps end-to-end, from design through deployment.
- Built the studio's site in Next.js with a serverless, spam-protected contact pipeline (Resend); grow the client base through Instagram marketing.

Projects

Ancora | *React, TypeScript, FastAPI, Python, PostgreSQL, Google Gemini, JWT* **2026**

- Built a full-stack AI relationship advisor that streams personalized, context-aware advice in real time via the Google Gemini API.
- Engineered a FastAPI + PostgreSQL (SQLAlchemy) backend with streaming chat, saved history and AI-generated titles, plus JWT auth with email verification.
- Deployed across Vercel, Render and Supabase with a GitHub Actions uptime workflow; fully bilingual (English/Serbian) React UI.

MealMuse | *React, TypeScript, Node.js, Express, PostgreSQL, Prisma, JWT* **2026**

- Full-stack meal-planning app with recipe search, favorites, a weekly planner and auto-generated shopping lists (Spoonacular API).
- Built a RESTful API with Node.js/Express and PostgreSQL via Prisma ORM, with JWT + bcrypt authentication and a modern Glassmorphism React UI.

TahoServis | *Laravel, PHP, MySQL, Blade Templates, Laravel Breeze* **2025**

- Full-stack role-based app for tachograph servicing with three roles (Client, Technician, Admin), each with a dedicated dashboard, booking and real-time status tracking.
- Automated PDF sealing-certificate generation upon repair completion using Laravel PDF (DomPDF).

Matiola | *Next.js, TypeScript, Tailwind CSS* **2026**

- Built a client website for a flower shop. Product showcase with a call-to-order flow.
- Delivered a polished, animated and fully responsive, SEO-friendly UI with smooth scrolling.

Technical Skills

Languages: Python, Java, JavaScript (ES6+), TypeScript, PHP, C++, HTML5, CSS3, SQL
Frontend: React, Next.js, Vite, Tailwind CSS, Framer Motion, Webflow
Backend: FastAPI, Node.js, Express.js, Laravel, REST APIs
Databases & Infra: PostgreSQL, MySQL, Supabase, Prisma ORM
Auth & Security: JWT, bcrypt, Laravel Breeze
DevOps & Tools: Git, GitHub, GitHub Actions, Vercel, Render, Figma, Postman, Claude Code
